### EXPERIENCE (Internship experience)

#### Responsive layout

All my Knowledge of website building is showcased in the below mentioned project.

- <https://srushti-rock.github.io/responsive-intensify/>

This layout was 1st ever responsive layout build by me by using only HTML and CSS and media query its fully responsive layout

- <https://srushti-rock.github.io/phaseshift/>

This layout is Responsive layout built by using Bootstrap, HTML, CSS and media query.

- <https://srushti-rock.github.io/prisum-bootstrap/>

This layout is Responsive layout built by using Bootstrap, HTML and CSS and media query.

- <https://srushti-rock.github.io/index/>

This layout is Responsive layout built by using Bootstrap, HTML and CSS and media query.

- <https://srushti-rock.github.io/flexbox-theory/>

This layout is Responsive layout built by using Flex-box, HTML and CSS and media query.

#### **Reliance Industrial Limited**, Navi-mumbai — *Internship*

3rd May 2016–13th June 2016 - **Vendavo 8 accelerate profit Analyzer**

I learned about the software called Vendavo which was all about the company profit and loss analyzer. This period of internship was totally a new learning experience for me, because it was not just being there for 1 and half month, it was to know the whole new corporate world, and to understand the office environment and work on improving my Soft skill.

#### **Flipkart**, Bhiwandi— *Internship*

14th September 2019 - 28th October 2019

This Internship was totally opposite to my 1st internship experience, and paid internship, basically this internship was to understand how the supply chain business runs on a large scale in the Business Sector and this experience taught me how to build the Business on a large scale.

### SKILL

## PROJECTS

### **ANDROID BASED SMART CONTROL SYSTEM - Diploma project**

The project was to build an android system by using advanced Technology like Bluetooth, by working on this project we learned up to what extent our technology has extended and how practically this technology is implemented, and how it works in the real world. This technology was used as an example in the Home Automation system where it was implemented on doors through which a person sitting inside anywhere in the house can open and close the door from their mobile phone.

### **PORTABLE MUSIC PLAYER WITH USER INTERFACE - BE final year project**

This Music player System is a portable based system that means user-friendly system or we can say we can keep this player in pocket and take it anywhere in the world, this system is an entertaining device for people. In this player we can save the music list and hear the music at any time and anywhere.
